- d. WASP participants finally earned recognition as part of the United States Air Force in 1977 under President Jimmy Carter.

# ANSWER KEY

## 10. Complete the dot-to-dot art activity and identify the airplane silhouettes.

The first operational aircraft designed to exploit low-observable stealth technology to evade detection by radar or sensors.

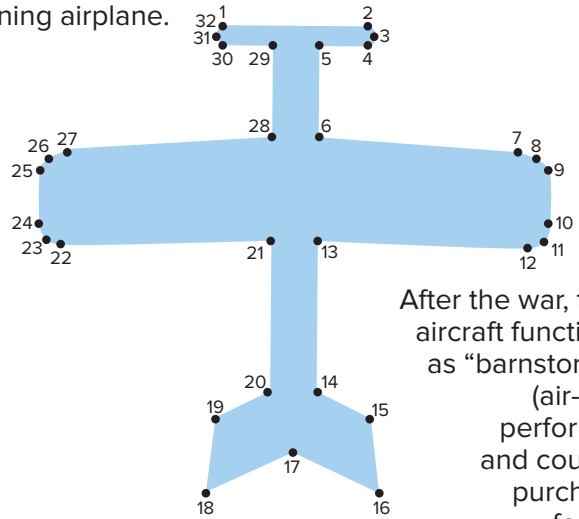

aircraft

**F-117 "Nighthawk"**

Used in the U.S. invasion of Panama, the Gulf War, and Kosovo. It also flew missions over Afghanistan and in Operation Iraqi Freedom.

America's most famous World War I training airplane.

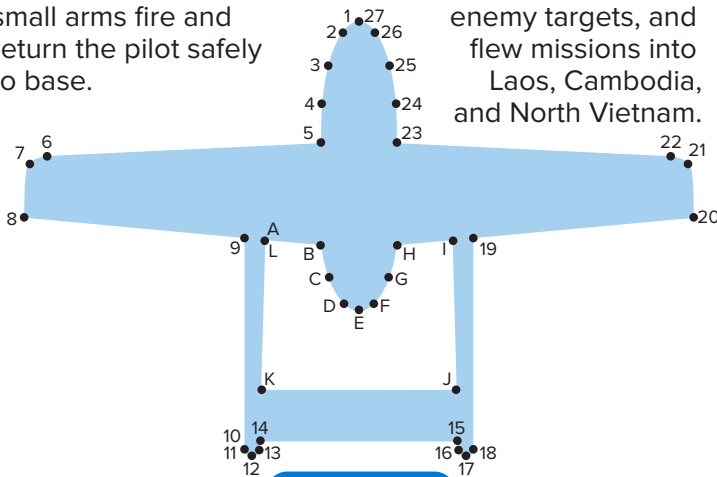

aircraft

**Curtiss JN-4D "Jenny"**

After the war, these aircraft functioned as "barnstormers" (air-show performers) and could be purchased for \$50.

Used during the Vietnam War, this aircraft could withstand an onslaught from small arms fire and return the pilot safely to base.

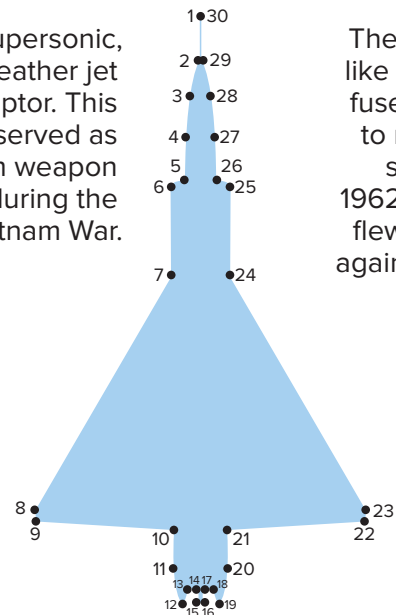

aircraft

**Cessna O-2A "Super Skymaster"**

This aircraft gathered intelligence on troop movements, directed airstrikes against enemy targets, and flew missions into Laos, Cambodia, and North Vietnam.

The first supersonic, all-weather jet interceptor. This aircraft served as an interim weapon system during the Vietnam War.

aircraft

**Convair F-102A "Delta Dagger"**

The Coke bottle-like shape of the fuselage helped to reduce transonic drag. In 1962, this aircraft flew air defense against the North Vietnamese.
