

STEAM

SUMMER PASSPORT

ACTIVITIES

June 27th to August 3rd, 2024

Hill Aerospace Museum's **STEAM Summer Passport Program** runs June 27th through August 3rd this year! Join us at the museum **Thursdays and Fridays** each week for science and history lessons with fun experiments, demonstrations, or hands-on activities! After students have participated in all four classes, they may report to museum staff to receive a special pin and graduation certificate. Registration is not required.

All programming is **FREE**. Limited seating available. First come, first served.

Thursdays

11:00 am

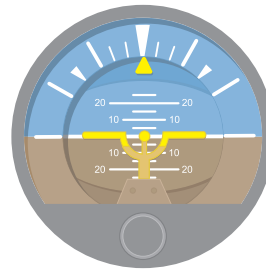

Aircraft Adventures

Discover the stories of aircraft throughout the years of Hill Air Force Base's history. Each week we will explore a different aircraft and get an up-close, guided view of each plane!

Fridays

11:00 am

Forces of Flight

Learn about the forces of flight and determine the effect of balanced and unbalanced forces. Each student will create a flying model to test out.

2:00 pm

Whether the Weather

Investigate the air masses that cause changes in weather patterns and how our missions adapt based on the weather! Programming includes information on air pressure, cloud formations, and varying weather phenomena.

2:00 pm

Rockets

Come learn about the history and design of rockets and missiles at Hill Air Force Base, then build your own to test and launch in front of the museum!
