

Helicopter Template

Paper Helicopter Instructions

Step 1: Cut along the solid line all the way around the helicopter outline.

Step 2: Cut down the solid line between Wing A and Wing B. Make sure to stop at the dotted line.

Step 3: Cut along the solid line above the X and Y foldouts.

Step 4: Take the X flap and fold it back along the dotted line.

Step 5: Then take the Y flap and fold it back over the X flap.

Step 6: For the remaining Z flap, fold it up along the dotted line. This is to keep the X and Y flaps in place.

Step 7: Fold Wing A backward along the dotted line.

Step 8: Then take Wing B and fold it forward.

Step 9: To fly your helicopter, hold the two wings together above the body of the helicopter and raise it above your head and let it go.

Step 10: Have fun!
